

Position: Shop Floor Associate
Reports to: ASC Production Supervisor
Area of Focus: Sanding-Rework / Dip-Spray Paint application / Quality Inspection

General Job Description:

- Sanding magazines to prepare for Reprocessing using general tools like sandpaper and scraping blades.
- Lifting up to 50lbs multiple times a day
- Standing for 100% of the day
- Inspect magazines to identify any that have not met our minimum standards.
- Using a shop vac to remove excess coating to prevent poor product.
- Racking and Un-racking parts on hooks for the dip line, laying parts on a tray for spray, or placing parts on fixtures for oven curing.
- Using air spray gun to coat magazines providing a clean, uniform finish that covers all surfaces of the magazine.

The ideal candidate for this position would be a quick mover who can ensure quality without sacrificing production. Must be able to work independently and stay focused at the task at hand to ensure the daily production goals are attained. They would also be willing to make sure they take proper precautions and do not take shortcuts that would result in poor quality product that would then lead to delays, or excessive labor costs used to rework magazines. We need this candidate to also be able to quickly learn what is acceptable and if there are issues, would need to bring it up immediately to prevent further less than perfect product. There should not be issues being exposed to chemicals that may present with odors.

Please Note:

All Shop Floor Associates and their roles are interchangeable which means there are other jobs and tasks that may be asked of them to alternate between in the event there are urgent needs in other departments. The other roles that they could be moved to are not described above.
